BEEMA BEEVI M K

Backend Engineer · Python · Django · REST APIs · AWS · Docker · DevOps

Kochi, Kerala · +91 7306419126 · beemabmk@gmail.com · LinkedIn · GitHub · Portfolio

PROFESSIONAL SUMMARY

Backend Engineer with 3+ years of hands-on experience (2+ years professional plus 1 year of intensive, project-based training) building scalable production systems using Python, Django, and AWS. Proven in designing secure RESTful APIs, scalable backend architectures, and financial transaction modules for enterprise government platforms and high-traffic B2C products (500K+ downloads, 50K+ DAU). Writes clean, maintainable code with strong emphasis on scalability, security, and Linux-based deployments. Available to join immediately.

TECHNICAL SKILLS

Backend: Python, Django, Django REST Framework (DRF), FastAPI, GeoDjango, OOP

Databases: PostgreSQL, MySQL, ORM Optimization, Database Indexing, Query Optimization, SQLAlchemy

Async & Caching: Celery, Redis, Background Task Processing, Message Queues

Cloud & DevOps: AWS (EC2, S3, RDS, SES), Docker, Docker Compose, Dokploy, Nginx, Gunicorn, GitHub Actions, CI/CD, Linux

Security: JWT, OAuth2, RBAC, Multi-Factor Authentication (2FA), CAPTCHA, Brute-Force Prevention, Secure Coding

API & Integration: RESTful APIs, Postman, Swagger/OpenAPI, OCI Storage, Payment Gateways (Mada, ZATCA Compliance)

Frontend: HTML, CSS, JavaScript, AJAX, Bootstrap, Tailwind CSS, Django Templates, React (beginner)

AI & Dev Tools: Claude AI, ChatGPT, Git, GitHub, Selenium, BeautifulSoup

PROFESSIONAL EXPERIENCE

Python / Django Backend Engineer | Veuz Concepts

Aug 2025 – May 2026

Project: Nadena Sports & Recreation Platform — Enterprise government platform (KSA Ministry)

- Architected and developed 14+ high-throughput RESTful APIs using Django REST Framework for a government-facing mobile app, powering QR-based attendance scanning, real-time trainer scheduling, and delegation workflows.
- Engineered a configuration-driven asynchronous export framework using Celery workers and Redis progress tracking, safely handling 55+ export types integrated with OCI cloud storage.
- Built the core Finance Management module including secure transaction mirrors, revenue aggregation, cash deposit tracking, and automated Mada card reconciliation with multi-tier approval workflows.
- Implemented a defense-in-depth authentication layer with OTP-based 2FA, secure JWT session rotation, and preventative mechanisms against brute-force and timing attacks.
- Containerized backend services using Docker and Docker Compose; managed deployments and environment configuration via Dokploy on Linux servers.
- Migrated discount and coupon calculation logic to a centralized backend engine, ensuring data integrity and eliminating client-side inconsistencies.

Python / Django Developer | Zecser Business LLP

Mar 2025 – May 2025

Remote Contract · Client Recharge Application

- Led system architecture and codebase initialization for a proprietary recharge platform, defining clean project structure and coding standards that reduced developer onboarding time by 20%.
- Deployed production applications on AWS EC2 with Docker, Nginx (reverse proxy), and Gunicorn (WSGI) on Linux, achieving scalable and fault-tolerant hosting.
- Integrated AWS S3, RDS (managed PostgreSQL), and SES for full-stack cloud infrastructure.
- Mentored engineering interns on Python/Django best practices, enforcing maintainable code standards through structured code reviews and Git workflows.

Python / Django Developer | Eduport

Jan 2024 – Feb 2025

B2C E-Learning Platform · 500K+ Downloads · 50K+ Daily Active Users

- Engineered core REST APIs for platform v2.0, redesigning database schemas and relational models to support high user concurrency at scale.
- Reduced API latency through advanced PostgreSQL query optimization, strategic indexing, and Redis caching layers.
- Debugged and resolved complex production issues across backend services, improving application stability and user experience.
- Collaborated with frontend, product, and QA teams to deliver seamless feature rollouts with full end-to-end integration.

TRAINING

Software Development Bootcamp | Brototype, Kochi

Dec 2022 – Nov 2023

Intensive, self-driven program with strict schedules, weekly deliverables, and mandatory reviewer evaluations

- Built an E-commerce web application using Django, Django Templates, HTML, CSS, AJAX, and Bootstrap.
- Built a School Management System using React, Django REST Framework, and Tailwind CSS.
- Delivered weekly project work under structured code reviews, incorporating reviewer feedback into the next cycle; completed communication training for technical discussions and team collaboration.

EDUCATION

Bachelor of Science in Physics 2019 – 2022

Mar Athanasius College (Autonomous), Kothamangalam, India
